1. The current gasoline shortage in Austria is the result of a trade agreement between the Soviets and some foreign country, requiring large gasoline exports by the Soviets. The quota for this agreement has now been fulfilled, and OROP stations in the Vienna area were allotted 120,000 gallons on 19 November, and 100,000 gallons on 22 November. It is estimated that supplies will be back to normal locally by the end of the month.*

- 25X1 * [redacted] Comment: According to observations in the American Zone of Vienna, there was no improvement in the past week.
